

RS Renewables Ltd. provides independent advice and consultancy services for renewable energy projects to businesses and the public sector.

We can help you select the right technologies, calculate the return on your investment and help you secure funding.

Once you have decided on the project details we can help with planning and grid connection as well as supplier selection.

If you need help in implementing your project we can also project manage all or some of the project representing your interests when dealing with suppliers.

If you wish to increase your own knowledge of renewable energy we offer a range of training courses.

You can also ask us for general renewable energy advice and day rate consultancy.

RS Renewable is lead by Rob Such B.Sc. MIET with over 25 years experience of working with complex technical solutions and a wide variety of customers from a broad range of industries and the public sector.
